

4th ESTIMATION & COMPUTATION

E&C-1

Round each addend to the nearest TENS place to estimate the solution .

E&C-1

$$\underline{556} + \underline{407}$$

Use front end estimation to round number to estimate the solution

$$\underline{576} - \underline{226}$$

Round these amounts up to the nearest TEN DOLLARS because you want to be sure you have enough

E&C-1

$$\underline{\$156.96} + \underline{\$224.99} .$$

E&C-2

I will give you 12 seconds for these facts.

$$\underline{7} \times \underline{8} \quad \underline{9} \times \underline{4}$$

$$\underline{45} \div \underline{9} \quad \underline{28} \div \underline{4}$$

Add these two 3-digit numbers.

E&C-3

$$\underline{556} + \underline{467} .$$

E&C-3

Subtract these two 3-digit numbers.

$$\underline{506} - \underline{193} .$$

Multiply these 2-digit by 1-digit numbers.

E&C-4

$$\underline{4} \times \underline{67}$$

E&C-4

Multiply these 2-digit by 1-digit numbers.

$$\underline{5} \times \underline{98}$$

Add these two fractions with like denominators.

E&C-5

$$\frac{2}{5} + \frac{1}{5} .$$

Subtract these two fractions with like denominators.

E&C-5

$$\frac{5}{8} - \frac{3}{8} .$$
