

QUARTER 1 REVIEW: PREALGEBRA

During the first quarter of **PREALGEBRA**, we studied:

- Patterns (number, letter, and practical patterns)
- Probability (ratio of favorable outcomes to possible outcomes)
- Order of Operations
- Powers and Roots
- Area formulas (parallelograms, triangles, circles, trapezoids)
- Pythagorean Theorem
- Percents (converting fractions and decimals to percents)
- Percents (finding a percent of a number, sales tax, discounts)
- Adding fractions/mixed numbers with unlike denominators
- Subtracting fractions/mixed numbers with unlike denominators

The circled concepts are those that I understand well. The easiest of those is _____.

The concept (from above) on which I need the most practice is _____.

At least **2 phrases that describe my effort and/or progress** in math during first quarter:

In this folder, I should have my **progress report, chapter 1 test, quiz (2.1-2.3), chapter 2 test**, and the assignment that shows my **best work** from the first quarter of prealgebra.
