

ANCHORAGE SCHOOL DISTRICT  
ANCHORAGE, ALASKA

ASD MEMORANDUM #184 (2001-2002)

January 30, 2002

TO: SCHOOL BOARD  
FROM: OFFICE OF THE SUPERINTENDENT  
SUBJECT: FY 2002-2003 PROPOSED FINANCIAL PLAN  
(SECOND READING)

RECOMMENDATION:

It is the Administration's recommendation that the School Board approve and authorize the Superintendent to prepare the Anchorage School District's FY 2002-2003 Proposed Financial Plan as set forth in the projected revenues and expenditure schedule in this memorandum (Attachment C). The total budget recommendation is \$454,862,275. This includes individual fund budgets currently projected as follows:

	<u>Proposed FY 2002-2003 Financial Plan</u>
General Fund	\$354,846,135
Food Service Fund	11,800,000
Debt Service Fund	53,216,140
Local/State/Federal Projects Fund	<u>35,000,000</u>
Total - All Funds	<u>\$454,862,275</u>

The total of local tax contribution to be requested is \$136,923,796.

It is further recommended that the School Board authorize the Superintendent to adjust the budget expenditure ceiling above in accordance with any change to the upper limit of the local tax cap limitation and any education-related ballot proposition that may be approved in the April 2, 2002, Municipal Election.

## PERTINENT FACTS:

### **THE BUDGETING PROCESS**

The budget provides a blueprint for the Anchorage School District's educational goals. When developing the budget, the Anchorage School District has an obligation to its many stakeholders—the students, parents, employees, and community members—to consider each group's priorities and balance them with the District's stated mission of educating students for success in life.

The FY 2002-2003 budget projections reflect the District's on-going efforts to achieve this balance, maximize performance and contain costs.

These projections for FY 2002-2003 are prepared using the most current information available. Existing funds and cost savings are directed to District programs to ensure that progress is made in achieving School Board Goals in the areas of academic excellence, supportive learning environment, and public accountability (Attachment D). The budget development process is mindful of the District's responsibility in designating financial and human resources within projected revenues.

### **BUDGET DEVELOPMENT**

The budget development process for the District is an ongoing process that encompasses over six months of gathering and analyzing information. The budget continues to realign the District's priorities, as budgeting is a progressive process. The balanced budget concept, Alaska Public School Funding, and the local property tax limitation necessitate early predictions of both revenues and expenditures. Throughout the process, assumptions, enrollment, revenues, and expenditures are constantly being reviewed and assessed in order to provide the most current information. Federal, State or local mandates may necessitate that the District incorporates additional responsibilities and/or initiate new programs within the District. Various demographic and economic factors are evaluated for their impact on the budget.

Departments and schools review their programs and responsibilities; assess what is being done during the current fiscal year and what progress is being made; begin making plans for next year and future years and then prepare budget requests based on their program requirements and how they support the Goals and Mission of "educating students for success in life."

The District continues with its efforts to seek input from the community, employees and students in the development of its preliminary budget recommendation. Input relative to economies and efficiencies in delivery of programs and services as well as additions and reductions in programs and services are sought. The seventeen budget review teams formed last year met in early October to review last year's recommendations, to receive a status report on these recommendations, and to provide additional input. The Superintendent and Administration conducted four town meetings – one in Eagle River, one in Girdwood and two in the Anchorage Bowl – to gather additional community, employee and student input. The District's web site also carried a suggestion box to which community members could submit recommendations, and suggestions forms were available at all of the schools and at the Public Affairs Department. Input was also solicited from the Minority Education Concerns Committee (MECC), various advisory committees, and the Anchorage Council of PTAs. All requests were evaluated seriously by the Administration prior to finalizing this recommended budget.

On October 29, 2001, a School Board FY 2002-2003 financial planning work session was held. A pro forma revenue and expenditure budget was presented based on the current information known at that time. Assumptions used for projection purposes were reviewed with the School Board. One major change impacting the revenue and expenditure projections was a revision to the projected enrollment for FY 2002-2003. Based on the current year's actual enrollment as of September 30, 2001 being 580 students less than budgeted, the spring enrollment projections for FY 2002-2003 were reduced from 50,369 to 49,922 students. This reduction in the number of students and changes in other assumptions used for projection purposes, such as the State assessed valuation for the Municipality, resulted in changes. The Administration also gathered suggestions and changes that the majority of the School Board members wanted the Administration to further investigate including any of the suggestions submitted by the staff and community members.

On November 12, 2001, the School Board authorized the Superintendent to prepare the Anchorage School District's FY 2002-2003 Preliminary Financial Plan in accordance with the financial projections set forth at that time. Authority to adjust the budget expenditure ceiling in accordance with any negotiated contract adjustments and other associated cost increases, School Board requests, Administration, community, staff and students' budget review recommendations was also given the Superintendent. In addition, flexibility was given to allow for adjustments based on updated demographics and/or economic information, as well as staffing based on review of student enrollment projections. The total of all department budgets as well as any new facilities or change in program requirements were compared to anticipated revenues. At

that time, it was projected that expenditures would exceed projected revenues by approximately \$3.7 million.

During the past two months as the Administration proceeded forward in preparing a FY 2002-2003 Preliminary Budget in which expenditures would equal revenues, the District's mission of educating students for success in life was always at the forefront. It was also recognized that this could not be accomplished without support and maintenance departments. Review and reassessment of assumptions and parameters were made again. Updated and new information was incorporated. Assessments of employee workload and reorganizations within departments to improve efficiencies were made. Community, staff and student suggestions were considered and implemented where appropriate. **After a great deal of review, consideration and discussion, the Superintendent is presenting to the School Board a balanced FY 2002-2003 Preliminary Budget totaling \$454,862,275. Expenditures have been brought into balance with revenues without making major cuts or using the fund balance as a revenue source. Although all departments' requests and needs were not able to be met, some program improvements such as Alaska Studies, Title IX girls' sports, additional assistant principals on the elementary school and middle school levels, additional counselors for elementary education, neighborhood patrol at the high schools, and certain management audit recommendations have been addressed. School Board approved increases to the Village Charter School enrollment and additional bus routes to transport Denali Elementary students to Kennedy Elementary School during construction of the replacement school have also been included.**

The Administration presented the budget to the School Board on January 15 and 17, 2002. A general overview was given by the Superintendent and then each administrator presented his/her budget identifying any major changes, including the program improvements.

The School Board considered for first reading the FY 2002-2003 Proposed Financial Plan at a special meeting on January 23, 2002. No revisions were made. The total budget recommendation for the four funds - General, Food Service, Debt Service and Local/State/Federal Projects Funds - remains at \$454,862,275.

**The Office of Management and Budget for the Municipality of Anchorage informed the District on January 28, 2002 that the five-year Anchorage municipal population change used in the property tax limitation calculations has been reduced from .73 percent to .47 percent. The impact of this change reduces the local tax cap limitation by \$278,984. Two other factors used in the**

**tax cap limitation calculations are not yet finalized. The Consumer Price Index will not be available until sometime in February and the new construction amount will not be finalized until March or April. At this time it is unknown whether these two factors will increase to offset or partially offset the reduction resulting from the lower percentage in the five-year population change. Hopefully, the final amount eligible under the local property tax limitation will be known when the Assembly approves the amount of tax appropriation and upper limit of the District's budget in the middle of March. If the amount of the property tax limitation is less than the amount of the taxes requested, the District will then need to take further action. If the Assembly were to reduce the upper limit of the budget by the same amount as the reduction in tax appropriation, then the School Board will be required to reduce expenditures. Reductions can be made either in the area of one-time expenditures or reoccurring expenditures.**

Student enrollments, revenues, and expenditures are projected on a preliminary basis. The following sections on Student Enrollment Projections, General Fund Revenues and Expenditures, and Other Funds summarize the principal financial planning factors involved in preparing initial FY 2002-2003 projections. Major revenue and expenditure considerations and budget development criteria are also included.

## **STUDENT ENROLLMENT PROJECTIONS**

**Student Enrollment** - The most significant factor in the budget development process is the number of students served. Enrollment projections are based on enrollment history, profile, and both demographic and economic considerations. The General Fund budget is developed using the FTE (full-time equivalent) student count, weighting both half-day kindergarten and preschool students at one-half, which is consistent with their programs.

In order to project student enrollment, District staff works closely with the Municipality of Anchorage in utilizing the Municipality's Geographic Information System. The following schedule summarizes the actual or projected student enrollment information for FY 1999-2000 through FY 2002-2003 on both a full count and FTE basis. The enrollment includes the increased enrollment to 220 students authorized by the School Board for Village Charter School on November 26, 2001.

	Actuals 1999-2000 <u>9/30/99</u>	Actuals 2000-2001 <u>9/30/00</u>	Actuals 2001-2002 <u>9/30/01</u>	Projected 2002-2003 <u>9/30/02</u>
Total Number	49,312	49,520	49,676	49,987
Change over previous year			208	156
311 Actual				
FTE (Full-Time Equivalent)	48,553	49,002	49,441	49,766

## **GENERAL FUND**

The General Fund, consisting of each school and department's budget, accounts for the majority of the District's operations and activities. Therefore, this memorandum and most of the subsequent discussion and decisions on balancing the budget for next year will focus primarily on estimated revenues and expenditures of the General Fund.

### Revenues

Major changes to the revenue projections for FY 2002-2003 as compared to FY 2001-2002 are listed on Attachment A.

**Alaska Public School Funding Program**—The largest single revenue source to the District comes from the Alaska Public School Funding Program. The School Board and the Administration appreciate the significant increase in revenue funding to the Alaska Public School Funding Program approved by the Legislature during the last session, as well as doubling the Learning Opportunity Grant allocation. Hopefully, during this upcoming legislative session, the Legislature will continue to advocate for the students in our communities, by funding an increase in revenues supporting public education.

This Program is expected to provide approximately 58 percent of the District's General Fund revenues. This is based on continuing the same per pupil amount for the base student allocation (\$4,010), Quality School Grant (\$16) and Learning Opportunity Grant (\$92.81) approved during the last Legislative session. The Department of Education and Early Development has agreed to an interpretation of the new language approved by the Legislature relative to the required local effort that has increased Foundation Aid approximately \$1.9 million more than originally anticipated. Based on current enrollment projections, the amount of funding for FY 2002-2003 is \$205.2 million, which is \$4.5 million less than the current FY 2001-2002 budget. This is a result of the projected student enrollment for FY 2002-2003 of 49,987 being 269 less than the FY 2001-2002 projected enrollment of 50,256. In addition, the State assessed property valuation for the

Municipality increased \$1.69 billion, which results in a larger required deduction causing a loss of \$3.4 million in the Public School Funding formula calculation.

The *Alaska Public School Funding* program is based on the average daily membership (ADM)—determined by the District's enrollment and special education intensive ADM count—processed through a school size factor and special needs formulae to establish the District's "basic need." The required local share and a percentage of the Federal Impact Aid funding that the District receives for Federally-connected students is then subtracted from the "basic need" to determine revenue. The Public School Funding formula defines the required local share as being the lesser of 45 percent of the preceding years "basic need" or 4 mills times one-half of the annual increase in total State assessed full and true valuation of local real estate, inventory and other taxed personal property for the second preceding year, added to the prior year's required local effort. **An increase to the assessed valuation reduces the potential amount of Public School Funding revenue.** The Alaska Department of Community and Economic Development has notified the District that the assessed valuation for Anchorage has increased from \$16.575 to \$18.262 billion. If the Twenty-second Legislature had not amended the funding formula last May, the District would lose an additional \$1.8 million in the current year and an additional \$5.2 million in FY 2002-2003, due to the increase in assessed property valuation.

**Local Property Taxes**—Local property tax contribution is the District's second largest General Fund revenue source. **Projected local property tax revenue for FY 2002-2003 is based on requesting the full amount of taxes available under the local property tax limitation.** The local property tax limitation provides for an annual adjustment for inflation, five-year Anchorage population change and new construction.

The projected inflation rate used for planning purposes is 2.90 percent. This preliminary estimate is the rate being used by both the District and the Municipality of Anchorage in the property tax limitation calculations. The official Consumer Price Index will not be available until February 2002. As determined by the State Department of Community and Regional Affairs, the five-year Anchorage municipal population change used for planning purposes is .73 percent. The projected combined rate of 3.63 percent for FY 2002-2003 is 1.66 percent more than the current rate of 1.97 percent for FY 2001-2002.

It is anticipated that this increase—and increased taxes allowed on new construction or property improvement—will increase the amount of taxes

available in the General Fund by approximately \$6.457 million. However, the Anchorage Assembly must first consider and approve the District's local property tax request. This increase in local taxes in the General Fund is partially offset by a decrease of \$5.055 million in local taxes in the Debt Service Fund. The net result for calendar 2002 will be a reduction of \$12 in taxes per \$100,000 of assessed valuation. Based on the estimated 2002 total assessed valuation received from the Municipality on October 8, 2001, it is anticipated that the mill levy will be reduced from 8.20 mills to 8.08 mills.

**Federal Impact Aid**—Since FY 1992-93, the District has been directly receiving all Federal funding appropriations related to students who reside on Federally owned land—rather than having the funding allocated to the State and then reallocated to the District in the form of State Tuition and additional Alaska Public School Funding revenue.

The initial revenue projection for Federal Impact Aid has been projected at 100 percent of projected entitlement, an anticipated increase of \$1.0 million from the FY 2001-2002 budget amount of \$9.5 million for a total of \$10.5 million.

The amount of Federal Impact Aid revenue each year is uncertain because it is subject to proration based on the annual funding appropriated by Congress. In addition, the percentage of the total number of federally-connected students to the total number of students the State has direct responsibility for—including military students, children educated at Mt. Edgecumbe and State correspondence (Alyeska)—and potential formula changes, could result in fluctuations in Federal Impact Aid funding to the District. This coupled with the fluctuation from year-to-year in the number of students living on military land, which can partially result from on base/post housing renovations, adds to the uncertainty of Federal Impact Aid revenue during the budget process.

This Program is subject to annual Congressional appropriation and should be monitored. We do not expect to know the funding level for FY 2002-2003 Federal Impact Aid until spring 2003.

**Fund Balance**—The District's undesignated fund balance for the General Fund is a potential one-time source of revenue. Deciding the appropriate level of fund balance required for a contingency reserve requires an exercise of judgment. Industry standards recommend undesignated fund balances or contingency reserves remain between 3 to 5 percent of the budget. The undesignated fund balance needs to be maintained to protect against shortfalls in revenue collection, to allow for adequate cash flow management, and to provide the financial ability to meet emergencies. As of June 30, 2001, the undesignated fund balance was approximately \$17.1 million or 4.8 percent of

the FY 2002-2003 initial financial plan budget of \$354.8 million. One consideration during the budget process is whether to use the undesignated fund balance as a revenue source. Not only is maintaining an adequate fund balance important; but also it is recommended that, if used, the fund balance only be used to support one-time expenditures. The undesignated fund balance is a potential one-time revenue source and is not reoccurring. It is recommended that the fund balance not be used to fund reoccurring expenditures such as additional staff positions. **At this time the Administration has not assumed any use of the Fund Balance as a revenue source.**

**Pupil Transportation Reimbursement**—The proposed FY 2002-2003 revenue projections for Pupil Transportation are based on full funding for the District and contracted routes, less hazardous routes. The projections include State reimbursement for transporting students that normally would attend Denali Elementary School to Kennedy Elementary School while the Denali replacement school is being constructed.

**User Charges and Fees**—For the FY 2002-2003 budget, fees will continue to be assessed for musical instrument usage, ASD documents, High School and Middle School Student Activity fees, High School parking fees, summer school, credit course training fees, rental fees and fees for Community Education. **No rate increases or decreases were included in the financial plan for FY 2002-2003.**

**Medicaid**—Based on FY 2001-2002 actual revenues and current year projections, it is estimated that the District will receive approximately \$800,000 in Medicaid funding based on information from the Alaska Department of Education and Early Development (DEED).

**E-Rate**—The District has received formal notification from the School and Libraries Division of the Universal Service Administrative Company that the District's application for E-rate funds for school facility communication upgrades for FY 2001-2002 school year was approved for all eligible services. The District is expecting to receive a contribution of approximately \$1.148 million for FY 2002-2003. These funds are included in the budget as a revenue source, offset by corresponding communications expenditures.

### Expenditures

Primarily student and program needs and a commitment to use the funds economically drive expenditure projections. Recommendations submitted from

the community forums, other interested community members who submitted suggestions by e-mail or by regular mail, staff, students, the administration and the Budget Review Teams' recommendations of this year as well as last year, were considered and incorporated into the budget where appropriate. The major changes in budgeted expenditures between FY 2002-2003 and FY 2001-2002 are included on Attachment B.

**Salaries and Benefits**—Employee salaries, wages, and benefits are projected to be approximately 85 percent of the operating cost of the District. This memorandum contains a medical re-opener for Anchorage Education Association (AEA) and a salary and medical re-opener for Teamsters 959 (Maintenance). Depending upon the settlement parameters defined by the School Board for collective bargaining for these contracts, the total revenue needed to support the programmatic assumptions discussed herein may be revised. Compensation provisions for completed contracts have been included in the projections. Funding for mandatory retirement and payroll tax adjustments known at this time is also included in the expenditure projections.

**Average Teacher Salary**—Further review and analysis of the current teacher salaries has been made to assist in determining the average teacher salary to be used in the budgeting process for FY 2002-2003. Contributing factors to the determination of the average teacher salary used include historical information of step increases, educational attainment and projected turnover. In addition, a Service Recognition Program (SRP) is being offered during FY 2001-2002. At this time it has not been determined which teachers will be participating in the SRP. An estimated amount of savings from this program has been included, but the actual amount of savings may vary based on the actual participants. An analysis of the number of vacancies at any given time has also been considered.

**Staffing**—Staffing requirements have been adjusted based on the official projections set forth as of September 30. Official projections are based on actual enrollment throughout the month of September.

**Certificated Teaching Positions**—Budgeted teaching staff is based on the FY 2001-2002 PTR (pupil to classroom teacher staff ratios), which continues with the staffing ratio adjustments, made at the second through twelfth grade. These ratios reflect the decrease in the PTR of 1 as of spring 2001. This reduction is due to increased funding in the Foundation Program and Learning Opportunity Grants approved during last year's legislative session.

Kindergarten (FTE)	20.5 to 1
Grades 1	21 to 1
Grade 2-3	24 to 1
Grades 4-6	27 to 1
Grades 7-8	25.54 to 1
Grades 9-12	27.08 to 1
Special Education	Staffing is based upon Demonstrated need and Program (consistent with current year)

**Indirect Cost**—In addition to charging eligible grants, the Administration plans to continue the practice put in place during the current year for charging the Food Service Fund the State approved indirect cost rate. This will more accurately reflect the cost of services provided the Food Service Fund by various departments budgeted in the General Fund.

**Contracted Services**—Where appropriate, an inflationary adjustment to contracts were allowed. A very close review of actual contracted services determined if inflationary increases are warranted. If other known rate increases were warranted, they were included in the budget. Utilities are budgeted based on analysis of usage and are adjusted according to projected rate increases and/or decreases as announced by the utility agencies.

**Pupil Transportation**—Contracted pupil transportation routes for FY 2002-2003 include in estimated increase based on COLA, three special education routes, one regular route due to boundary changes in Eagle River, four additional routes to transport students from Denali Elementary School to Kennedy Elementary School during the construction of the replacement school, and two new routes to serve students participating in the Title I Child in Transition/Homeless Project.

**Major Maintenance**—The Administration recommends maintaining the funding level for major maintenance projects of \$2,674,161 for some of the District's more than 80 school facilities. As our facilities continue to age, periodic maintenance must take place on a regular basis to keep the buildings in good repair for optimum safety and efficiency. The community has voiced strong support for prioritizing this use of funds.

**Supplies**—Where appropriate, an inflationary adjustment to supply appropriations were allowed. Some departments, however, may show an increase in supplies based on departmental need to service the total District

program requirements (i.e., fuel requirement to run District vehicles, Alaska Studies). The current projections include the same school supply and equipment per pupil allocation as in the current year.

**Equipment**—Equipment purchases between \$5,000 and \$50,000 will be purchased from the Equipment Replacement Fund. The projections in this memorandum do not include funds for the purchase of buses or any maintenance vehicles. The FY 2002-2003 Proposed Budget includes only a small amount of funds for replacement or new equipment other than the amount included in the student supply/equipment allocation. It is anticipated that the current year's budget has sufficient upper limit spending authority to allow for some additional one-time equipment purchases to be made this year.

## **OTHER FUNDS**

**Food Service Fund**—This fund is used to budget and account for operations of the Student Nutrition Program. The budget for this fund covers both the direct and indirect cost of providing meals to students. These costs include all payroll costs, food costs, the cost of support services, equipment repair and replacement costs, and indirect overhead charges. The FY 2002-2003 budget has been increased to accommodate the employee-negotiated contracts, upward movement in food costs, an increase in the indirect costs, and also to cover planned high school cafeteria upgrades.

The revenue sources for the Food Service budget include revenue from meal sales, Federal reimbursement for meals served, and the undesignated fund balance. This budget projects increases in meal sales and reimbursement revenue.

The Administration is recommending the use of Food Service fund balance for the FY 2002-2003 Food Service budget. The undesignated fund balance for the Food Service Fund as of June 30, 2001 was approximately \$481,000. Of this amount, \$200,000 is being recommended to support the FY 2002-2003 Food Service budget. This will leave an approximate amount of \$281,000, which is 2.4 percent of the FY 2002-2003 Food Service Fund budget as presented in this memorandum. These projections do not reflect any changes in the meal prices and it is projected that no local tax support will be required for the Food Service Fund in FY 2002-2003.

**Debt Service Fund**—This fund is used to budget and account for principal and interest payments on existing school bonds as well as the revenues necessary to fund these expenditures. Some of the District's bonds receive State debt

reimbursement, which varies depending on the year in which the bond proposition was approved. **The projections include the anticipated sale of \$73.15 million of bonds in the second quarter of FY 2002-2003 related to the April 1999 voter-approved propositions. Potential bond propositions for April 2002 have not been included in the projections.**

**Local / State / Federal Projects Fund**—Expenditures in the Local/State/Federal Projects Fund are offset by matching revenues. The District continues to be successful in increasing grant funding from various State and Federal agencies and other sources. Revenues available through grants for these projects include competitively awarded grant funds—most of which are subject to federal and State annual appropriations. It is projected that budgets for FY 2002-2003 grants will increase approximately \$1.0 million based on the anticipated favorable receipt of grants in FY 2001-2002. The District should continue to receive the same or greater level of funding for the Local/State/Federal programs. It is not known at this time the amount of additional federal funding that the District will receive under President Bush’s newly approved education plan. If the amount is in excess of the currently budgeted contingency amount, the District may be required to request additional spending authority from the Anchorage Assembly.

**FISCAL YEAR BUDGET COMPARISON**

The following schedule compares by fund the FY 2002-2003 projected revenue/expenditures with those currently approved for FY 2001-2002.

<u>REVENUE/EXPENDITURE BUDGETS</u>			
<u>Fund</u>	<u>Revised Budget FY 2001-2002</u>	<u>Proposed Budget FY 2002-2003</u>	<u>% Over /(Under) Prior Year</u>
General	\$355,920,728	\$354,846,135	(.30%)
Food Service	10,983,000	11,800,000	7.44%
Debt Service	47,751,978	53,216,140	11.44%
Local/State/Federal Projects	<u>34,000,000</u>	<u>35,000,000</u>	2.94%
All Funds	<u>\$448,655,706</u>	<u>\$454,862,275</u>	1.38%

<b>TAXES</b>	Revised	Proposed	Increase
	<u>FY 2001-2002</u>	<u>Budget</u> <u>FY 2002-2003</u>	<u>(Decrease)</u>
General Fund	\$107,301,568	\$113,758,901	\$6,457,333
Debt Service	<u>28,219,506</u>	<u>23,164,895</u>	(
<u>5,054,611)</u>			
All Funds	<u>\$135,521,074</u>	<u>\$136,923,796</u>	<u>\$1,402,722</u>

**The increase of \$1.4 million of overall taxes being requested for FY 2002-2003 will result in a reduction in taxes per \$100,000 of assessed valuation. Based on the estimated 2002 total assessed valuation received from the Municipality on October 8, 2001, it is anticipated that the mill levy will be reduced from 8.20 mills to 8.08 mills.**

#### **STUDENT ENROLLMENT PROJECTIONS**

	FY 2001-2002	FY 2002-2003	Change
	Actuals	Projected	Over Prior
	<u>Sept. 30, 2001</u>	<u>Sept. 30, 2002</u>	<u>Year's Actual</u>
Enrollment	49,676	49,987	311
Full Time Equivalent (FTE)	49,441	49,766	355

In preparing the FY 2002-2003 Proposed Financial Plan, many budget development uncertainties still face the District.

- School Board areas of interest
- Projected enrollment
- FY 2002-2003—Contract for Anchorage Education Association (AEA) medical re-opener and the Teamsters 959 contract with salary and medical re-openers
- Closed campuses
- CPI and 5-year average population growth used for local tax limitation not finalized until February 2002
- New construction and assessed valuation amounts used for local tax limitation not finalized until March/April 2002
- Federal Impact Aid subject to annual appropriation
- Medicaid reimbursement
- Legislative action (State and Federal)

## **SUMMARY**

Our assumptions in preparing the FY 2002-2003 projections were based on, but not limited to, the following criteria:

- Balanced budget for presentation to the Anchorage Assembly—Expenditures equal Revenues
- Local Property Taxes—Full amount available under the property tax limitation
- No use of Fund Balance as a revenue source—the undesignated fund balance as of June 30, 2001 was \$17.1 million or 4.8 percent of \$354.8 million
- Potential adoption or expansion of programs must be funded within existing resources
- Maintain current Family Cap on High/Middle School Activity Fees
- Maintain current user fees
