

V. **Historical Population Growth Factors And Administrative Policies Affecting School Enrollment**

Residential Births in Anchorage: While the number of births in Anchorage has not always proven to be a reliable predictor of kindergarten membership, the information does provide an indication of future long-range trends. The movement of families in and out of the municipality, as well as the number of births per household, affects the value of this data. Table 4 presents data on residential births occurring in Anchorage since 1980. While ASD Demographics observes all birth patterns its focus is Births Adjusted to School Year. Since 1993, the numbers of births in Anchorage began a decline. Births went from a high of 4,900 to a low of 4,200. The first real increase in the number of births in Anchorage since the early 1990s was in 2004, with 153 births. It is estimated that births will continue to increase, as will the corresponding kindergarten enrollment.

School-Age Children in Total Population: Historically, school membership levels in Anchorage have reflected the city's population growth. Since 1996 the population in Anchorage has increased by 12 percent. During the same period of time, school membership increased by 1 percent. Current school membership represents 17 percent of the Anchorage population, down approximately 2 percent from early-2000 levels. However, it is important to note that both the addition of mandated and community-desired school programs, more students with special needs, as well as major shifts in the residential location of the student population, have substantially affected space requirements in many district facilities. Table 5 lists Anchorage population and school membership for the years 1996-97 through 2008-09. It also includes the military student population on-base and off-base for the same period. The number of military students has increased by nearly 200 students (3.9 percent) over the last two years.

Monthly Public School Membership: School membership typically declines from the fall to the spring at the secondary levels, whereas elementary membership remains quite constant. However, this year was different for elementary schools as they continued to grow throughout this year. Table 6 summarizes end-of-the-month school membership from 1977-78 to 2007-08.

Grade Level Membership: Analyzing the historical grade level membership in Table 7 indicates certain trends in school membership. For example, the kindergarten membership averaged 3,801 students during the 1990s. That average declined to 3,543 from 2000 to 2003. However, for the last five years the average kindergarten enrollment has increased to 3,664.

These kindergarten enrollment patterns have a ripple effect through the higher grade levels. From 2002 to 2007, the secondary levels benefited from the large kindergarten classes of the 1990s. Secondary numbers peaked in 2005 with a membership of 22,925 and decreased to 21,876 in 2008. Their numbers are expected to continue to decline slightly as a result of the smaller entering (kindergarten) classes of the 2000s.

Tables 7A-7D provide details of the summary in Table 7, by school and by grade within each school.

High School Attendance Area Membership: Tables 8 and 9 present historical elementary and secondary membership broken down by geographic area. In prior years these tables have referenced high school attendance areas. The tables in this report are based on the same groupings of feeder schools as prior years, to allow historical comparison. However, since there is not a one-to-one relationship between feeder schools and next higher level of schools, it is more appropriate to refer to geographic areas, rather than high school attendance areas. This information provides basic data for analyzing shifts in student population. Table 10 provides information on ASD special services programs membership.

Non-Public School Membership: Data on private school membership has historically been collected by the district. Table 11 summarizes this data for the years 1999-2000 to 2008-09. Table 12 lists the individual schools and their 2008-09 memberships.

Attendance Zones and Boundary Exceptions: School board policies and procedures permit students to attend a school or program outside their regular attendance area, provided classroom space is available. When there are no openings for a school or program, a lottery is conducted and a waiting list is developed. Students on the waiting list are admitted in sequence as openings

occur. Transfer requests are to be monitored to ensure that such transfers do not result in crowding of facilities or racially isolated school populations.

Boundary Adjustments: Changes to attendance boundaries are normally required as a result of opening a new school or shifts in student population. The factors listed below serve as a guide for boundary adjustment recommendations:

1. The geographic proximity. The maintenance of the area or neighborhood school concept where feasible. Non-contiguous boundaries are contrary to school board policy and district planning objectives.
2. The transportation of students. Any redistricting should attempt to minimize travel time for students and overall transportation costs, as well as minimize hazardous conditions for students walking to school.
3. The development of a "feeder" school network in which elementary school boundaries do not overlap those of middle schools and senior high schools; and middle school boundaries do not overlap those of senior high schools.
4. The retention of a reasonably balanced racial ethnic membership in all schools.
5. The relationship of boundary adjustments to historical student assignment changes. Efforts are made to avoid reassignment of students who have been affected by an earlier boundary change.
6. The maintenance of a commitment to long-range planning decisions.

Table 4**Anchorage Area Births 1980 - 2008**

Calender Year	Anchorage Area Residential Births	Births Adjusted to School Year*	Year of Expected Kindergarten Entry	Actual Number of Kindergarten Entry
