

# Workgroup Manager: Setting a Default Desktop

This procedure will reset the desktop picture to the default for all members of the workgroup. Users will be able to change their desktop picture while logged in, but this change lasts only until the user logs out.

## Set Desktop Picture

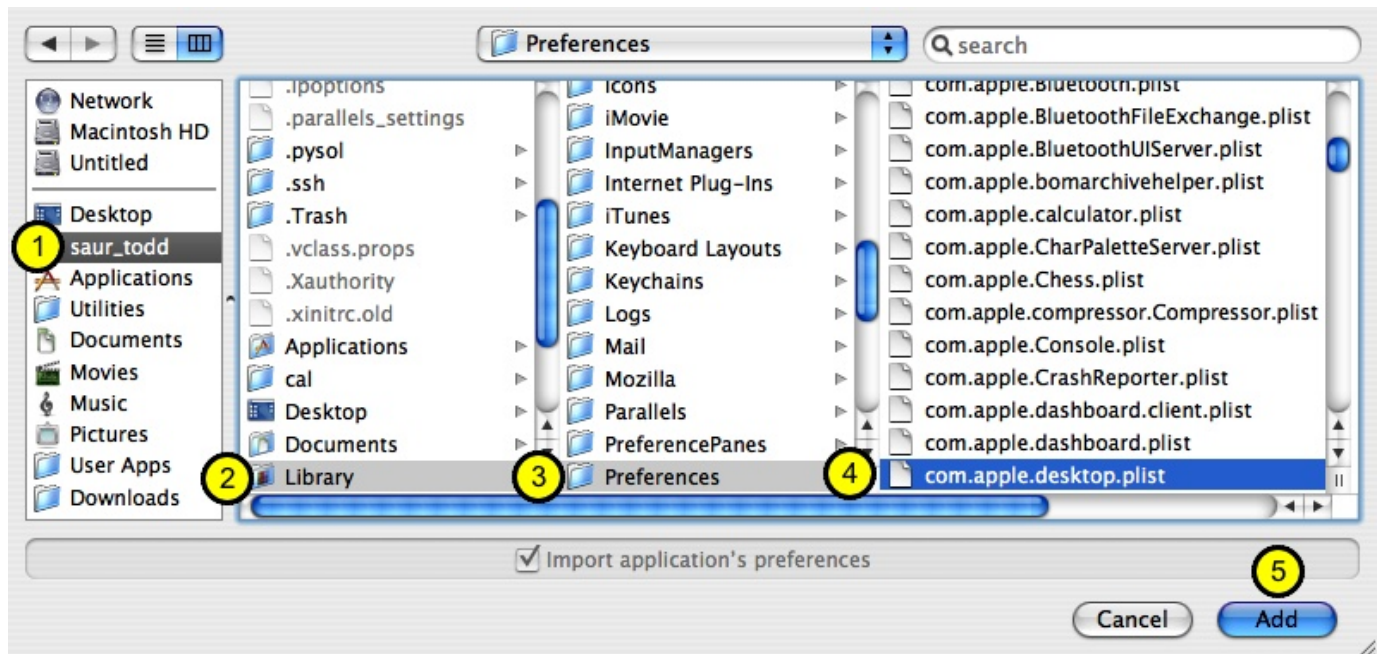

1. Open System Preferences.
2. Select Desktop & Screen Saver.
3. Click on Apple Images.
4. Select Aqua Blue.
5. Quit System Preferences.

## Open Workgroup Manager

1. Click on the lock and authenticate as xx\_admin.
2. Select a workgroup
3. Click on Preferences in Work Group Manager
4. Click on the Details tab
5. Click the add button

## Select the Preference File

1. Click on Home folder
2. Click on Library
3. Click on Preferences
4. Select the file - com.apple.desktop.plist
5. Click Add
