Climate Survey Results for Mountain View Elementary School

The Anchorage School District administered the School Climate and Connectedness Surveys in spring 2008 to students in grades 5-12, all school staff and parents/guardians of students in grades K-12. The surveys were done to provide schools with information about perceptions and experiences related to school climate for use in setting school goals and redirecting resources. In the spring of 2008 grades 3 and 4 students were involved in a pilot survey for measuring school climate and connectedness. The results are currently under review by the American Institutes for Research.

Respondents were asked to answer a series of questions that were related to a certain concept. For each item, there were five options from which to choose a response. The answer options ranged from strongly disagree (1) to strongly agree (5).

Each question in the survey related to a factor or concept, and a score was calculated based on the mean response for the questions related to each factor. The factors measured in the survey were:

- **School Leadership and Student Involvement:** This factor reflects students' feelings about the decision making of school leaders as well as student participation in the school governance. Students selected responses between 1 and 5 where 1 indicates a low level of school leadership and student involvement and 5 indicates a high level of school leadership and student involvement.
- **Respectful Climate:** This factor reflects students' feelings about fairness of rules and respect for students' contributions. Students selected responses between 1 and 5 where 1 indicates a lack of a respectful climate and 5 indicates a highly respectful climate for students.
- **High Expectations:** This factor reflects students' feelings about their own expectations as well as those of adults in their school and community. Students selected responses between 1 and 5 where 1 indicates a lack of high expectations and 5 indicates a high level of high expectations.
- **School Safety:** This factor reflects students' feelings about bullies and gangs at school as well as general crime and violence in the community. Students selected responses between 1 and 5 where 1 indicates a low level of school safety and 5 indicates a high level of school safety.
- **Peer Climate:** This factor reflects students' feelings about how respectful students are to one another and how helpful students are to other students. Students selected responses between 1 and 5 where 1 indicates a more negative peer climate and 5 indicates a very positive peer climate at the school.
- **Caring Adults:** This factor reflects students' feelings about how close they feel to adults in the school. Students selected responses between 1 and 5 where 1 indicates a lack of caring adult relationships and 5 indicates strong caring adult relationships at the school.
- **Social and Emotional Learning:** This factor reflects students' ability to think about the consequences of their actions and to empathize with others. Students selected responses between 1 and 5 where 1 indicates that students at the school perceive themselves as having poorer social and emotional learning, and 5 indicates higher levels of social and emotional learning.
- **Community Involvement:** This factor reflects students' feelings about how supportive and welcoming the school is with parents and the community. Students selected responses between 1 and 5 where 1 indicates a less supportive and welcoming environment and 5 indicates a more supportive and welcoming environment.
- **Overall Climate:** The overall climate score was computed as the mean of three scales: school leadership, high expectations and school safety.
- **Overall Connectedness:** Overall connectedness score was computed as a mean of three scales: respectful climate, peer climate and caring adults.
