

21st Century Community Learning Center Anchorage School District

ROCKET LAUNCHER STAFF TRAINING WORKSHOP

Presented by Ginny Gates, Science
Department, ASD.

**FEB 14, 2012; 4:15– 5:45PM AT
WILLIWAW ELEMENTARY**

Learn how to make the physics of rocket flight fun and engaging for all students. Participants will construct their own straw rockets out of straws, index cards and modeling clay; and then test them on the Straw Rocket Launcher. Just like early rocket pioneer Robert Goddard, participants will conduct scientific experiments by varying the trajectory angle and force of the launch. These rockets can travel up to 50 feet!

Target audience: Teachers/TA of grades K-6

Max. class size: 20

Registration:

For permanent employees, please register through MLP. For temporary employees/ community workers, register through the link posted on ASD website 21st CCLC's page.
