

APPENDIX C

Appendix C contains basic information concerning educational space specifications for elementary, middle, and senior high schools.

ELEMENTARY SPACE SPECIFICATIONS

The general space specification for an elementary school is based on projected enrollment of about 550 students in grades K-6. Based upon the State of Alaska Elementary Space Allocation of 106.25 square feet per elementary student, a school will be approximately 58,300 square feet and will be built upon a 15-acre site having no existing infrastructure.

It should be noted that these are preliminary educational space specifications and may change after detailed review of the schematic.

In addition to the standard elementary school curriculum, this facility will also provide pull out educational programs in resource rooms for main-streamed special education students and students requiring tutorial instruction. The space allocation for schools with additional special education or special services programs utilizing self contained classrooms may be granted an additional square footage allowance with DOE approval..

* These function/space allocations are flexible, to be finalized by the Building Committee.

NOTE: The school sq. ft. per student adjusts by State formula based upon membership, school size, and grade level served.

MIDDLE SCHOOL SPACE SPECIFICATIONS

The Anchorage School District is in the process of updating the space allocation for middle schools. These are space specifications for a middle school with a projected enrollment of 1,058 students in grade 7 through 8. The update will be based upon the State of Alaska Secondary Space Allocation of 150 square feet per secondary student. New facilities will be about 158,000 square feet and be built upon a 30-acre site having no existing infrastructure.

The District's allocation recommendation will be based on Mirror Lake and Golden View middle schools. The revised ed spec will be presented to the Board before the end of the school year.

In addition to the standard middle school curriculum, middle schools will also provide educational programs for main-streamed special education students and students requiring tutorial and special services instruction. The space allocation for schools with additional special education or special services programs utilizing self-contained classrooms may be granted an additional square footage allowance with DOE approval.

Summary of Space Requirements

Basic Program	Standard	
	T.S.	Total
Core Academic/Science	33	39,820
Special Education	0	6,600
Instructional Media Center	0	6,400
Visual Arts	2	3,050
Performing Arts	3	5,270
Physical Education	4	23,000
Career Education	4	6,500
Administration	0	3,820
Student Services	0	2,290
Student Dining & Food Service	0	11,400
Maintenance & Custodial Services	0	1,570
Subtotal		109,620
Building Support Areas		44,165
Total	46	153,885

NOTE: Anchorage School District middle school capacity would be 46 teaching Stations multiplied by a capacity factor of 23 students per teaching station for a total of 1,058 students.

Core Academic Space Requirements

Required Space	Standard		
	Qty.	S.F.	Total
Basic Program			
Language Arts	8	900	7,200
Mathematics	8	900	7,200
Social Studies	8	900	7,200
World Language (May be associated with Library/Media Center)	1	900	900
Science	8	1,200	9,600
Science Prep/Storage	4	250	1,000
Planning Center	8	340	2,720
Textbook and Equipment Storage	4	200	800
Lockers	8	400	3,200
Total	33		39,820

Notes:

1. Based on 8-team Goldenview model.
2. Building support area to incorporate staff toilet facilities in this area.

Special Education Space Requirements

Required Space	Standard		
	Qty.	S.F.	Total
Basic Program			
	8		
Resource/Study Skills/Small Group Room	2	500	4,000
Reading/Bilingual/Small Group Room	1	250	500
Basic Life Skills/Intensive Needs [Wet Lab]	1	1,200	1,200
Behavioral Support	0	900	900
Total	12		6,600

NOTES:

1. Resource/Small Group Rooms to be provided within the Core Academic areas. Locating two adjacent with a folding sound divider increases the flexibility of these spaces.
2. Reading/Bilingual Small Group Rooms to be located to support school program.

Library / Media Center Space Requirements

Required Space	Standard		
	Qty.	S.F.	Total
Basic Program			
Main Reading, Reference, Stacks and Circulation			4,500
Librarian's Office	1	150	150

HIGH SCHOOL SPACE SPECIFICATIONS

The Anchorage School District has engaged in exciting process of planning, programming and building/renovating high schools in the District. The new District-wide Educational Specification document, approved by the Board June 1998, will serve as a tool to describe the program and design requirements for any future high school planning in the District.

A working committee comprised of teachers from District high schools, parents, students, administrators, and community representatives developed the Educational Specification document. This group participated in two intensive planning labs to discuss their vision of high schools in the future and the potential impact this will have on the facilities. Discussions focused on curriculum trends, aspects of a restructured high school, and various program-delivery options. Participants worked in small groups and focused on the goals, needs and requirements of each program area. They also identified the specific relationships and adjacencies of each program area to other areas within the school. The resulting document contains information needed to guide the architects and construction managers in developing the designs and construction documents for the facility.

Educational Programs

The Anchorage high schools offer comprehensive programs that include a variety of offerings, both required and elective, in the following general-subject areas:

- Core Academics (English, Math, Social Studies, World Language, Science)
- Visual Arts
- Performing Arts (Instrumental Music, Vocal Music, Drama)
- Junior ROTC
- Physical Education/Health
- Family and Consumer Science
- Business Education/Marketing
- Technology Education

An extensive Vocational Education program is offered at the King Career Center.

Design Considerations

Several general characteristics must be considered in designing a new high school. The building must be carefully integrated with existing site conditions, nearby neighborhoods and traffic patterns. If the design involves renovation and additions, careful consideration must be given to the existing building to make it contiguous with the planned changes. Site circulation must be designed to safely zone different types of vehicular and pedestrian traffic. Building design must be organized to aid in wayfinding and be easy to supervise and monitor. Ample hallway and common space must be included. It must be possible to separate and secure public-use spaces from other school spaces while providing access to telephone and restroom facilities. Interior lighting must be appropriately provided to meet the needs of each instructional area. Exterior lighting must be balanced to provide safe ingress and egress at all hours. Exterior landscaping should be planned to integrate the existing vegetation, support site circulation, beautify the grounds and provide adequate on-site snow storage, without posing safety hazards. Bus areas and student drop-off/pick-up areas need to be separated from other traffic functions.

Project Parameters

The high school Educational Specification is designed to be flexible to meet the needs of a high school of 1200, 1600, or 2000 students in grades 9 through 12. Additionally, a plan was developed for a 600-student optional high school. The ed spec can be applicable for future high schools and additions/renovations.

The summary of space requirements for these sizes of schools is based on the State of Alaska Secondary Space Allocation of 150 square feet per student. It is not possible to provide dedicated space for all the functions that occur in a modern high school. To accommodate the need for space, the ed spec identifies basic program space to be provided in all schools. Additional programs can be provided by prioritizing and combining use for the functions listed on the lower section of the Summary of Space chart.
