

## Library Resources Workflows Bulletin 9

---

### **Topic: QuickDraw upgrade**

#### **Related Topics: Print Item Barcodes bulletin #10**

---

**Introduction:** The new QuickDraw is version 7, the company is TekLynx Label Matrix. The new version will need to be loaded and the CD with registration information stored on site. Each copy of Label Matrix is licensed for one computer.

To upgrade an existing product, make sure the older version is currently installed on your system and you have the activation code for the upgrade.

Insert the CD

The CD's opening screen will appear.(If the CD does not automatically open, on the task bar, click the Start button, then click Run. Type the letter of the CD-ROM drive, followed by CDSetup.exe. (D:\CDSetup.exe).

On the opening screen of the CD.

Select QuickDraw and then select Install-

The installation wizard will begin to load.-

Select the desired language for the software interface screens and click OK.-

Product code screen will appear and will prompt you for the 25-character activation code provided on the back of your CD envelope or on a white paper insert. The code may be entered with or without dashes.

Click Continue Install when the code has been entered. (If the Continue Install button does not activate, the activation code is not correct)

Continue to follow the installation wizard until the installation is complete.
