

5th GEOMETRY

G-1

Which triangle is:
scalene
equilateral
isosceles

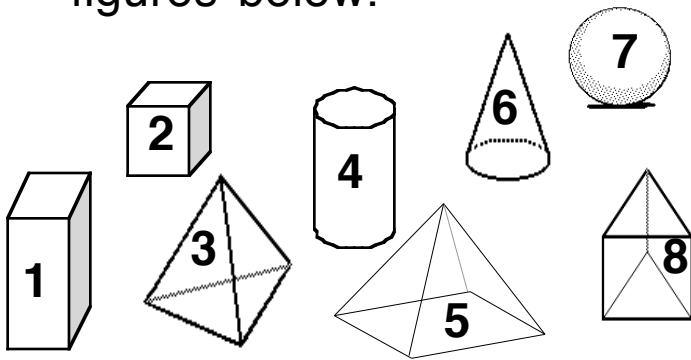

G-1

What is the specific name of each quadrilateral.

G-2 Name the three dimensional figures below.

Sketch a transformation of this shape. G-3

Is the transformation pictured below a slide, flip, or turn of the original?

G-4 Sketch 2 shapes to meet the criteria.

Are the 2 shapes below similar, congruent, symmetrical, or more than one of these?

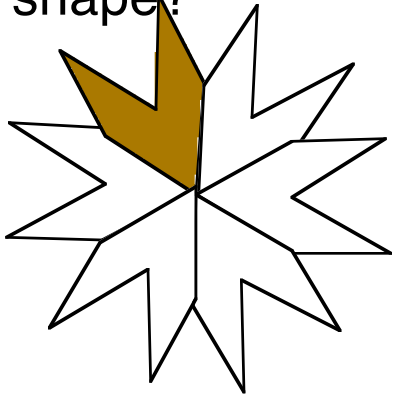

G-5

Is this tessellation a result of slides, flips, or turns of the shaded shape?

G-5

Is this design a result of slides, flips, or turns of the shaded shape?

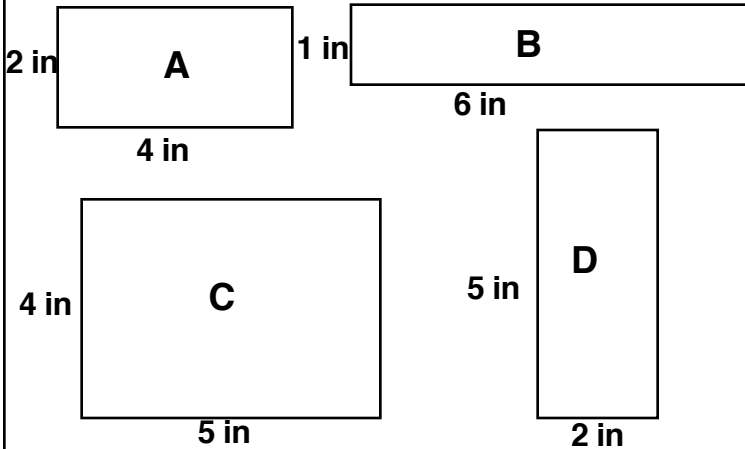

G-7

If the length of each square on the grid is ____ about what is the _____ of this circle.

G-6 Perimeter and area.

What is the _____ of these rectangles?

G-9 Which figure below appears to be an example of perpendicular segments?

Draw a line segment and estimate where to place a midpoint. Label the midpoint "M."

G-8

What are the coordinates of the points A and B on the grid below?
