

SCHOOL IMMUNIZATION REFERENCE GUIDE

Alaska Regulations require that all students be immunized (4 AAC 06.055)

Before admission to an Alaska public school, every parent must:

- **Provide an immunization record** from a physician, health department, or other health care provider showing dates (month, day, year) of required immunizations; **OR**
- **Obtain required immunizations.** If there are medical or religious reasons a child cannot be vaccinated, call the school nurse for further information. There is a **State Medical Exemption** form for medical exemptions and a **Religious Exemption** form that needs to be notarized.

STUDENTS WITH NO SHOT RECORDS OR WAITING FOR SHOT RECORDS:

- ✓ To be admitted, a child must receive one dose each of DTP/DT/Td, Polio, Hepatitis A, Hepatitis B and MMR vaccine; K-6 must also have a dose of varicella. Pre-school children must have Hib vaccine and varicella vaccine or have a history of varicella disease documented on the state form by a medical provider (MD/DO/ANP/PA).
- ✓ A signed physician's statement (on the State Medical Exemption form) is required if there are medical reasons a child cannot be vaccinated. Only a physician (MD/DO), physician's assistant or advanced nurse practitioner licensed in Alaska is authorized to exempt children from immunizations.
- ✓ To remain in school a medically verified record must be provided showing the dates of all required immunizations, or the remaining immunizations must be given.
- ✓ Military or students in the Homeless program, please discuss your shot records with Health Services or your school nurse. Federal law makes a 30 day provision for qualifying circumstances.
- ✓ **Children not complying with immunization requirements must be excluded from school.**
