

Baseline Testing Instructions for ASD Students

To ensure a valid test, please follow these instructions. It is very important that you are able to fully concentrate during the entire test. Poor performance will result in an invalid test and will require a re-take!

- ▶ No headphones or cell phone use during the test.
- ▶ Turn off any televisions, radio or anything else that can produce background noise.
- ▶ Tell others about the importance of the test to avoid interruptions or distractions.
- ▶ Note the test will begin by asking you background questions called the “demographic” section.
- ▶ There are 6 test sections called “modules.” These include word memory, design memory, Xs and Os, symbol match, color word match and three letters.
- ▶ Take your time to read each section’s instructions very carefully. Each module is self explanatory.
- ▶ It is common to perform the color word match module incorrectly, please read that section’s instructions thoroughly.
- ▶ Other than the initial demographic section, do not ask anyone to help you with your performance during the test, such as assistance with memory questions, etc. Do not write anything down during the test to aid memory.
