

# Raptor VisitorSafe™

The Flexible, Low-Cost Way of  
Managing Visitors

## What is it?

Raptor VisitorSafe revolutionizes school visitor management with cutting-edge technology, ensuring safety and convenience for the entire school community. With advanced verification technology and customizable workflows, VisitorSafe helps enhance safety and ensure a secure and seamless visitor experience at your school.

## How does it work?

Raptor VisitorSafe uses advanced ID scanning technology to verify visitor identities. When a visitor's ID is scanned, their information is instantly checked against the sex offender registry and custom databases, such as those with custody orders and banned visitor status. If a match is found, school officials are immediately alerted. The system logs all visitor data for efficient tracking and reporting, providing a secure and streamlined check-in process for parents, volunteers, and contractors.

## About Raptor

For over 20 years, Raptor has been driven by our mission to protect every child, every school, every day. Used by over 60,000 schools worldwide, Raptor is the gold standard in school safety.

# Key Features

## Advanced Verification

Raptor VisitorSafe utilizes cutting-edge ID scanning technology, ensuring that visitors are accurately verified against registered sex offenders and custom databases, enhancing school security.

## Deploy Anywhere

With minimal Bluetooth technology schools can create sign-in and sign-out stations anywhere.

## Customizable Workflows

Easily configure VisitorSafe to accommodate staff and students as well as volunteers and contractors. Streamline the process and capture the information you need for any type of person entering and exiting your buildings.

## Instant Alerts

The system instantly notifies administrators if a visitor is flagged as a potential threat, allowing for prompt action and ensuring the safety of students and staff.

## Efficient Check-Ins

VisitorSafe streamlines the check-in process for parents, volunteers, and contractors, making it quick and easy to record and monitor visitor entries and exits.

## Late Arrivals

Ensure accurate records and easily process late arrivals and with customizable reasons and configurable thresholds.

## Early Dismissals

Allows approved guardians to check out students for early dismissal, keeping a record for school administration.

## Track Staff Activity

Track staff and district-wide employees for consistent records of substitutes, staff, and itinerant teacher sign-ins.

## Detailed Reporting

VisitorSafe automatically logs all visitor data, enabling schools to generate comprehensive reports for security analysis and compliance purposes.

## Sync with SIS

The system syncs with Student Information Systems (SIS) to ensure up-to-date information about students and guardians, simplifying the management of late arrivals and early dismissals.
