Students and Parents Tabs

Student Tab – Dynamic Student Edition
Choose a book, a chapter, and then a lesson.

1. In the center of the page is the student textbook. Click on any sentence. What happens? Is there any support for your Spanish speaking students when you click on the sentence?

2. Interactive manipulatives are indicated by a red star ★ and accompany the activities. If there is an interactive manipulative in the menu, read the activity in the book and then work with the manipulative. Where else can you find these interactive manipulatives?

3. Play one of the Lesson Tutorials. The examples shown in the tutorials are parallel to those in the texts. Explore some of the other examples from the lessons. How might these help you? How might the tutorials help your students at home?

4. Is there any Math Tool Paper listed in the menu? If so click on one. How will this help your students?

5. Choose Section 5.2 in the Skills Review Handbook and in the Basic Skills Handbook. List the differences you notice between the two pages.

6. Scroll down to the end of the student book to see the Fair Game Review. Is there any support for the students to help them with these questions? If so, where?

7. Name 3 other items in the Dynamic Student Edition menu and tell how you and your students might use those items.
8. Use the back arrow, then choose **Chapter Review**. Then click **Vocabulary Help**. What kind of puzzle did you find? Do all of the chapters have the same type of puzzle? Try one. What if a larger version is needed? Did you have the Result Summary Appear? What could you do with this? If a student asked the computer to solve the puzzle how will you know on the Result Summary if the student or the computer answered the question?

9. Use the back arrow, then choose **Chapter Test**. Then click **Test Practice**. Can this test be graded? Printed? Re-taken? Are there any quizzes that can be taken online? If so, where are they and what are they called?

10. Click on the Parent Tab. List at least 3 items you found here and how they might help parents work with their children at home.
