Your Investments at Work

New main entryways were created with controlled access for increased student and staff safety with more secure access for families and community visitors to schools.

At Rabbit Creek, for example, the main office was relocated to face the visitor entrance to the school, allowing for more defined monitoring and safety measures. The addition of IP security cameras also addressed security issues. Recreating the main entryways required the reconfiguration of interior walls. It is anticipated that the new spaces will result in reduced energy consumption.

At Turnagain Elementary, portions of the roof were replaced. Additional parking and a longer drive-through lane make access safer and easier for students, families, and staff. Art, health, and resource classrooms were built at Gladys Wood, as well as enclosing the library and expanding the music stage.

At Mountain View Elementary, there is improved front office security and renovated primary bathrooms. Flooring, ceilings, walls, doors, and

roof sections were also replaced.

Emerging school needs met included:

- West High School – roof soffit in pool area
- Fire Lake Elementary – roof replacement
- Inlet View Elementary – domestic water supply improvements

Renovation at Airport Heights Elementary School was significant and included adding a new multi-purpose room, dedicated art, health, and music rooms, and more adequate and sufficient space supporting special education students with intensive needs.

Over the last decade, ASD has **retired and paid off** almost **\$218 million** in bond indebtedness.

2013 and 2017 Approved Bonds—

Improvements at
35 ASD Schools

West High/Romig Middle Schools IMC Renovation

\$6.8 million

Bartlett Cafeteria and Kitchen Renovation

\$4.7 million

Girdwood K-8 School Construction

\$23 million

Aurora Gym Addition

\$5.75 million

Planning and Design for Future Work

\$10.7 million

Building Life Extension Projects

\$10.65 million

West High/Romig Middle Schools IMC Renovation

At West High and Romig Middle schools, projects repaired damage sustained during the 7.1 earthquake on January 24, 2016, which included structural upgrades, the addition of five classrooms, and improved flexibility in an instructional media center.

Bartlett High School Cafeteria and Kitchen Renovation

Providing a centralized cafeteria and kitchen for efficiency and safety, named in honor of a beloved teacher, Tanya Taylor-Winchester. Taylor-Winchester was a Bartlett alumnus, graduating in 1988. In naming the cafeteria in her honor, the School Board recognized Tanya as a “beloved member of the Bartlett staff, inspirational teacher, and mentor for new teachers.” She was described as one who embraced everyone she met with a genuine smile and interest in their life.

Girdwood K-8 School Construction

Meeting a great need for the families in Girdwood, a major renewal created a new K-8 learning space with a two-story expansion housing middle school students, a gym, and a commons/library complex. The roof systems were completely reworked.

Aurora Elementary School Gym Addition

Continuing to serve military families on JBER, a gym facility was added at Aurora Elementary to provide increased learning spaces.

Planning and Design for Future Work

At nine schools, required planning and design provided the foundation for the most efficient procurement and process development.

Building Life Extension Projects

At 19 schools, protecting the facilities and extending the life of publicly owned spaces demonstrates the commitment of the District to the accountability to residents.
