

2022 AK STAR and Alaska Science Assessment

Each spring, Alaskan students are provided an opportunity to show what they know. When students show what they know, teachers and parents can partner to promote student success. This year, the State of Alaska Department of Education has partnered with NWEA to align the English language arts and mathematics tests with the MAP Growth benchmark assessments students take in fall, winter and spring. This balanced assessment system will target instruction and better support meeting students' individual learning needs.

AK STAR (Alaska System of Academic Readiness) and the Alaska Science Assessment are administered to students in Grades 3-9 (English language arts and mathematics) and grades 5, 8 and 10 (science) each spring. The purpose of a large-scale, summative assessment is to provide parents and schools an overall picture of a student's progress in meeting the Alaska standards at his/her grade level. The assessment is taken on the computer and is not timed, but each content area takes approximately 150-180 minutes. Additionally, an English Learner student who has recently arrived to the country in grades 3-9, will not be taking the ELA portion of AK STAR.

Parents can locate resources for the new AK STAR test and the Alaska Science Assessment, including directions for Practice tests and Tutorials on the ASD website at <https://www.asdk12.org/akstar>.

Parents can also help by ensuring their children are well rested, eat a nutritious breakfast, and are at school on time for the days of testing. Please avoid scheduling appointments on your child's testing days.

The ASD AK STAR and Alaska Science Assessment testing window allows for school assessment scheduling flexibility. Students! Get ready to show what you know during our school's AK STAR and Alaska Science Assessment testing dates: March 29 through April 30.

2022 AK STAR and Alaska Science Assessment Testing Window

March 28-April 8
