Anchorage, Alaska 99504
Phone: (907) 742-0335
Fax: (907) 742-0350
Principal: Christopher Woodward

March 26, 2025

In the event of a volcanic event with potential for local ashfall, the following emergency protocols will be put in place.

ASD will notify the community of plans for school closures and the early release of students.

Schools will contact parents to request that students be picked up as soon as possible.

At Chester Valley:

- All students will be given a facemask to wear.
- School staff will contact families through the Remind App and by individual phone calls.
- Anyone picking up a student must have a government-issued photo ID and also be listed as a primary or emergency contact in the student file. All students will need to be physically signed out for dismissal.
- **Students with last names beginning with A-M** will be dismissed through the front entrance. Parents should drive into the bus loop and will be met by a school staff member who will then have their child/children sent out.
- **Students with last names beginning with N-Z** will be dismissed through the side (parking lot) entrance. Parents should drive into the parking lot loop and will be met by a school staff member who will then have their child/children sent out.

In the event of actual local ashfall:

- All students will be moved into the interior of the building and exterior doors and windows will be sealed to prevent ash intrusion into the building.
- Parents will pick students up as noted above, but they will need to exit their vehicle upon reaching the front of the line.

ASD will notify the community of school closure duration and of any plans to make up missed days of school.
