I. Introduction and Overview of CIP Document

The Anchorage School Board is responsible for providing an adequate educational environment for the students of Anchorage. To fulfill this obligation, the school board regularly engages in comprehensive long-range planning of school facility construction, renovation, and maintenance. On an annual basis, the school board adopts a Capital Improvement Plan that addresses the anticipated levels of student enrollment and shifts in enrollment, along with school facility condition and functionality from an educational perspective. Typically, this plan delineates the district's construction priorities over the succeeding six-year period. Starting in 2007-08 the plan covered the succeeding 10-year period.

The steps in preparing the 10-Year CIP are listed below:

1. Survey all Anchorage area private schools for membership data.
2. Collect birth data from the State of Alaska Bureau of Vital Statistics and population data from the State demographer.
3. Determine total military membership residing on and off military installations from the ASD's Information Technology Department.
4. Survey all district principals to determine school space utilization.
5. Input six-year membership forecasts into computer spreadsheets, which generate student projection tables.
6. Receive administrative recommendations for alleviating negative conditions projected in facility usage based on the ten-year forecast.
7. Obtain approved recommendations from the district's Capital Request Advisory Committee.
8. Present draft CIP to the Municipal Planning and Zoning Commission for recommendation to the school board.
9. School board review and approval of the CIP.
10. Transmittal of CIP to Anchorage Assembly and to the State Department of Education and Early Development (EED).

This document is divided into four major sections:

- School Facilities and Educational Structure
- Capital Improvement Recommendations for 2010-11 to 2019-20

- Historical Population Growth Factors and Membership Projections for 2010-11 to 2015-16.
- Appendices providing detailed membership projections; graphs of demographic facts related to the student population; standard space specifications; the process used for selecting new school sites; and the current status of district facilities as it relates to original construction and any additions in gross square footage.

II. SCHOOL FACILITIES AND EDUCATIONAL STRUCTURE

The Anchorage School District operates and maintains the largest physical plant of any public entity in the state, with approximately 7.5 million square feet of facilities. The replacement value of district buildings exceeds \$2.0 billion. The district has 93 facilities, comprised of eighty-seven schools and six support facilities. In addition, there are twelve alternative and charter school programs. The district houses more than 49,000 students and 5,000 staff members.

Forty-six elementary schools are organized K-6, while Chester Valley, Chugiak, Creekside Park, Fire Lake, Mountain View, Muldoon, Nunaka Valley, Ptarmigan, Russian Jack, Scenic Park, Susitna, Tyson, Williwaw, and Wonder Park elementary schools are organized K-5. Aurora, Mt. Spurr, and Orion elementary schools are located on Elmendorf Air Force Base. Ursa Major and Ursa Minor elementary schools are located on Fort Richardson Army Post. Due to a decline in enrollment on Fort Richardson, Kennedy Elementary School was closed at the end of the 1999-2000 school year, and has been used as temporary housing for other schools undergoing renovation projects. This year, Chester Valley Elementary is housed at Kennedy as its school undergoes renovation which is scheduled to be completed before 2010-11. Two elementary schools have a K-8 organizational pattern: Northern Lights ABC and Girdwood K-8 School.

Central, Goldenview, Gruening, Hanshew, Mears, Romig and Wendler middle schools are organized for grades 7–8. Begich, Clark, and Mirror Lake middle schools are organized for grades 6-8. Bartlett, Chugiak, Dimond, Eagle River, East, Service, South and West senior high schools are organized for grades 9–12.

Polaris K-12 School, an alternative elementary/secondary program, is organized for grades K–12. Continuation, Crossroads, and Steller Alternative secondary programs are organized 7–12. Two other alternative secondary programs are organized 9–12: AVAIL and Benny Benson. AVAIL is housed at the Fifth Avenue Mall; Benny Benson is housed at the ASD Benny Benson building, while Crossroads is housed at the Success by Six building in Mountain View. SEARCH, an alternative secondary program that is organized for grades 7-8, is also housed at the Benny Benson building. SAVE, another alternative secondary program, is organized 10-12 and is housed in its own facility. ASD's Continuation School, serving students in grades 7-

12, is housed in mall space on International Airport Road; Creating Optimal High School Opportunities (COHO), an alternative secondary program that is organized 9-12, is housed at Chugiak High School.

In the 1997-98 school year, three charter schools became part of the ASD: Aquarian (K-6), Family Partnership (K-12), and Walden Pond (K-6). In 1998-99, Village Charter School (K-8) began operations. Due to enrollment problems, Walden Pond closed in December 2000 and Village closed in December 2004. In 2003-04, two charter schools opened their doors, Highland Tech (7-12) and Frontier (K-12). Two additional K-6 charter schools opened in 2005-06: Eagle Academy and Winterberry—currently K-8. Rilke Schule (K-8) began operation in 2007-08. In 2008-09 the Alaska Native Culture Charter School (K-6) began operation.

Special Education services are offered in all elementary and secondary schools in the district. Two school facilities, Mt. Iliamna on Elmendorf Air Force Base and Whaley School, are dedicated to serving students with significant disabilities.

In addition, the district operates three state contract programs: Alaska State School for the Deaf and Hard of Hearing, Providence Heights, and McLaughlin School. The district also operates special educational programs for students in five residential facilities: Jesse Lee Home, Booth Memorial, McKinley Heights, Charter North Hospital and North Star Hospital.

Elementary schools feed into middle schools and middle schools feed into high schools. Although it is always a goal of boundary setting to place a feeder school within the boundary of only one higher level school (i.e., elementary to middle school or middle school to high school), this is not always possible. In 2006-07 middle schools underwent an extensive boundary study to incorporate Begich and to better align middle school boundaries with high schools. The boundaries took effect in the 2007-08 school year. The following listing shows those middle and area-wide schools that are located within each high school attendance area. It also includes the percentage of the Middle and area-wide school's enrollment that lives in the boundary of that high school (if there are split boundaries).

Senior High Schools

Bartlett High School

Tudor Elementary School - 100%

Note: Feeder patterns determined using 10/9/2009 Zangle data extract.

III. CAPITAL IMPROVEMENT NEEDS AND GOALS

Not only is the District's inventory of facilities large, it is also aging. Fifty-one schools are over 20 years old, and of these nine are over 50 years old.

Building components wear out. Facility systems only last so long. Roofs deteriorate and leak; heating, plumbing, and ventilation systems wear out; structural systems age. Various code changes require updating electrical and mechanical systems, access for the physically disabled, hazardous materials removal, and renewal of various building system components.

Functional obsolescence is another fact of life for older schools. Over the life of a school, programmatic changes take place that demand updating the facility infrastructure. There is a continual need to update the electrical distribution systems in the schools to accommodate current technology. Current educational delivery methods require physical layouts that are often different and more flexible from those of 30 to 40 years ago. Without renewal, these schools do not provide ASD students the same educational opportunities, parity of program and facilities across the school system.

Additional capacity to house the constantly shifting student population is the third component of capital requirements. Anchorage is the largest district in the state, and while its overall enrollment has been steady in recent years, the geographic distribution of students continues to shift due to the high mobility of the Anchorage population. To meet short-term capacity needs in the affected schools, the ASD has over 130 relocatable classrooms available.

Capital Improvement Goals

The following goals guide decision-making with respect to school facilities in ASD:

1. To make maximum use of existing school and support facilities.
2. To provide the necessary facilities for programs that supports the standard school.
3. To close and rededicate, or dispose of, existing schools and support facilities where necessitated by significant declines in student membership, building deterioration beyond feasible upgrade or repair, program adjustments or municipal and state codes.
4. To reduce the level of dependency on temporary building facilities (relocatables) whenever possible.

5. To construct or purchase school buildings and support facilities in order to achieve a reduction in leased facilities wherever practical.
6. To maintain the school board approved organizational plan of grades K-6, 7-8 and 9-12. Exceptions to this goal are the following board approved programs: Girdwood K-8 School, Northern Lights ABC School K-8, Polaris K-12 School, Steller Secondary 7-12, Mirror Lake Middle School 6-8, Begich Middle School 6-8, and Clark Middle School 6-8. As facilities allow, 6-7-8 grade configurations for middle schools are preferred.
7. To adjust school boundaries wherever such adjustments are deemed as promoting the optimal utilization of school facilities, a reduction in transportation costs or the development of contiguous boundaries for "feeder" schools.
8. To review the Capital Improvement Program with appropriate municipal departments prior to its annual submittal to the Anchorage Assembly.
9. To design and construct traffic safety improvements that implement municipal land use and transportation goals and policies by
 - a. Promoting the convenience and safety of student, pedestrian, and bike travel
 - b. Retaining school open space and recreation areas to meet current and future community recreation needs as identified in adopted plans
10. Consider improvements to minimize energy use.

IV. CAPITAL IMPROVEMENT RECOMMENDATIONS: 2010-11 to 2019-20

The Board and Administration are evaluating needs for 21st century education at the high school level, and vocation-technical education generally. The board highlights the identification of possible Vocational Education Training Facilities as a study item having no assigned priority. Decisions on direction for vocational technical education may alter other priorities in coming years.

Tables 1, 2A, and 2B summarize recommended 10-year capital improvement projects and their estimated cost. Table 3 shows the agency interface required for undeveloped sites infrastructure. Cost estimates are based on Fiscal Year 2010 costs. Adjustments to the cost estimates will be made in future years due to fluctuations in construction costs and scope of work identified in the initial planning or design stages of the projects. In addition to the projects included in this CIP, the District also allocates general funds every year for Maintenance and Maintenance Projects, which is \$23,503,167 for FY 2010-2011.

Definitions:

Alteration:

The changing of the internal arrangement or other physical characteristics of an existing facility so that it may be effectively used for its designed purpose.

Improvement:

The addition of quality features to existing space by upgrading building systems or architectural finishes, such as installation of carpet or window coverings.

Minor Facility Renovation:

Projects entailing renovation, alteration or improvement of an existing facility, generally in one building component, such as roof or ventilation.

New Construction:

Erection of new facility or expansion of an existing facility that adds to the overall dimensions and can include site improvements.

Renewal:

Extending the useful life of facilities, which includes replacing worn-out or inefficient major building components, retrofitting for energy conservation, eliminating health and life safety problems, and meeting updated regulatory requirements.

Renovation:

Total or partial upgrading of a facility to higher standards of quality or efficiency.

V. **Historical Population Growth Factors And Administrative Policies Affecting School Enrollment**

Residential Births in Anchorage: While the number of births in Anchorage has not always proven to be a reliable predictor of kindergarten membership, the information does provide an indication of future long-range trends. The movement of families in and out of the municipality, as well as the number of births per household, affects the value of this data. Table 4 presents data on residential births occurring in Anchorage since 1980. While ASD Demographics observes all birth patterns its focus is Births Adjusted to School Year. Since 1993, the numbers of births in Anchorage began a decline. Births went from a high of 4,900 to a low of 4,200. The first real increase in the number of births in Anchorage since the early 1990s was in 2004, with 153 births. The 2009 estimate of 4,803 is the first time the numbers have reached the highs of the early-90's. It is estimated that births will continue to increase, as will the corresponding kindergarten enrollment.

School-Age Children in Total Population: Historically, school membership levels in Anchorage have reflected the city's population growth. Since 1996 the population in Anchorage has increased by 12 percent. During the same period of time, school membership increased by 1 percent. This year there was a 1.7% increase (803 students) in membership over 2008-09. Current school membership represents 17 percent of the Anchorage population, down approximately 2 percent from early-2000 levels. However, it is important to note that both the addition of mandated and community-desired school programs, more students with special needs, as well as major shifts in the residential location of the student population, have substantially affected space requirements in many district facilities. Table 5 lists Anchorage population and school membership for the years 1997-98 through 2009-10. It also includes the military student population on-base and off-base for the same period. The number of military students has increased by nearly 200 students (3.9 percent) from 2006-07 to 2008-09.

Monthly Public School Membership: Table 6 summarizes end-of-the-month school membership from 1978-79 to 2009-10.

Grade Level Membership: Analyzing the historical grade level membership in Table 7 indicates certain trends in school membership. For example, the

kindergarten membership averaged 3,801 students during the 1990s. That average declined to 3,543 from 2000 to 2003. However, for the last five years the average kindergarten enrollment has increased to 3,662.

These kindergarten enrollment patterns have a ripple effect through the higher grade levels. From 2002 to 2007, the secondary levels (7-12) benefited from the large kindergarten classes of the 1990s. Secondary numbers peaked in 2005 with a membership of 22,925 and decreased to 21,876 in 2008. Their numbers were expected to continue to decline slightly as a result of the smaller entering (kindergarten) classes of the 2000s.

However, secondary numbers increased by 149 students over 2008-09. In addition, K-6 levels increased by 809 students. These increases are the result of increased military enrollment and in-migration from other states.

Tables 7A-7E provide details of the summary in Table 7, by school and by grade within each school. This year we have a new section for charter schools.

High School Attendance Area Membership: Tables 8 and 9 present historical elementary and secondary membership broken down by geographic area. In prior years these tables have referenced high school attendance areas. The tables in this report are based on the same groupings of feeder schools as prior years, to allow historical comparison. However, since there is not a one-to-one relationship between feeder schools and next higher level of schools, it is more appropriate to refer to geographic areas, rather than high school attendance areas. This information provides basic data for analyzing shifts in student population. Table 10 provides information on ASD special services programs membership.

Non-Public School Membership: Data on private school membership has historically been collected by the district. Table 11 summarizes this data for the years 2000-2001 to 2009-10. Table 12 lists the individual schools and their 2009-10 memberships.

Attendance Zones and Boundary Exceptions: School board policies and procedures permit students to attend a school or program outside their regular attendance area, provided classroom space is available. When there are no

openings for a school or program, a lottery is conducted and a waiting list is developed. Students on the waiting list are admitted in sequence as openings occur. Transfer requests are to be monitored to ensure that such transfers do not result in crowding of facilities or racially isolated school populations.

Boundary Adjustments: Changes to attendance boundaries are normally required as a result of opening a new school or shifts in student population. The factors listed below serve as a guide for boundary adjustment recommendations:

1. The geographic proximity. The maintenance of the area or neighborhood school concept where feasible. Non-contiguous boundaries are contrary to school board policy and district planning objectives.
2. The transportation of students. Any redistricting should attempt to minimize travel time for students and overall transportation costs, as well as minimize hazardous conditions for students walking to school.
3. The development of a "feeder" school network in which elementary school boundaries do not overlap those of middle schools and senior high schools; and middle school boundaries do not overlap those of senior high schools.
4. The retention of a reasonably balanced racial ethnic membership in all schools.
5. The relationship of boundary adjustments to historical student assignment changes. Efforts are made to avoid reassignment of students who have been affected by an earlier boundary change.
6. The maintenance of a commitment to long-range planning decisions.

Table 4**Anchorage Area Births 1981 - 2009**

VI. Membership Projections Summary: 2010-11 to 2015-16

Forecasting Methodology and Assumptions: The principal methodology used to project the 2010-11 through 2015-16 enrollment is known as the cohort-survival technique. The basic technique involves calculating the ratio of the number of students in one grade during one year compared to the number of students who "survive" the year and enroll in the next grade in the following year. This survival rate calculation treats the student body in an aggregate fashion, using historical membership data. It is affected by such factors as school promotion, net migration and withdrawal rates. All of these factors are included in the term "survival" as it is used in this context.

Fluctuations in the data from year to year create a pattern from which an average survival rate can be calculated to project future student membership. For example, if over a period of several years an average of 96 percent of the student membership in grade three goes on to grade four, and if 300 children are now enrolled in grade three, then next year's grade four membership may be estimated at 96 percent of 300 or 288 students. Twelve average rates of survival are calculated for a system with thirteen grades (kindergarten is considered to be a grade). These rates can then be applied to present student membership and used to project membership levels for each succeeding year.

Projecting future kindergarten membership is more complex. Grade-to-grade cohort survival cannot be used, since there is no preceding grade for kindergarten. Therefore, information such as estimates of the number of children in the 1-5 year old population cohorts, the number of live births five years previously, and recent trends in kindergarten are utilized. This year's forecast for kindergarten enrollment was derived from historical kindergarten enrollment and historical births (adjusted for school year). These projections were used to determine kindergarten enrollment for the next six years. Indicators of housing and development trends were then incorporated into these projections.

Projections for individual schools are derived using the benchmark numbers realized through the cohort-survival and kindergarten projection methods. The allocation of students to each school is done by examining historical trends in

individual school membership, as well as historical and projected housing and economic trends for that area.

A good population forecast should be driven by assumptions. If the assumptions behind the forecast are considered reasonable and the methodology employed is professionally acceptable, the forecast will represent a credible attempt to estimate future ASD membership levels for planning purposes. The assumptions, which were employed in developing the 2010-11 to 2015-16 membership forecasts, are described below.

ASD projections contained in this document do not reflect the impact of any major events occurring in the next six years: construction of the natural gas pipeline, opening of ANWR for oil exploration, closure of military installations; major changes in the state's economic or political structure. It is assumed, however, that oil and mineral exploration will continue in Alaska throughout the decade, perhaps at a more rapid pace than in recent years. It is also assumed that industry in Anchorage will continue to develop and their employment levels will affect the ASD membership.

Economic, demographic, and housing data are utilized in the formulation of long-range student membership projections. Information supplied by the state demographer, MOA Department of Public Works, State Department of Labor (AKDOL), and the State Bureau of Vital Statistics, has been utilized in formulating the six-year student membership projections.

According to AKDOL, in 2009 the Anchorage economy lost jobs for the first time in 20-plus years. These losses are likely the result of the national recession which is now impacting Alaska. Every industry, except health care and government, lost jobs. Early estimates indicate that small losses will continue through 2010.

The Anchorage economy has seen increased property valuation, increased housing supply, and low interest rates. With a 2009 average sale price of \$320,720 (AK MLS), home purchase is less affordable for some and continues to be a reason for out-migration to the Matanuska-Susitna Borough.

Although Anchorage is experiencing some out-migration to Mat-Su, there has been in-migration from the lower-48, as well as some in-migration from rural Alaskan communities, resulting in a net migration of 3,184 residents over 2008 (AKDOL). Much of the in-migration has been an increase in the military population.

Recent population projections by the state demographer indicate that Anchorage will have a net increase of 2,628 residents from 2006 to 2010. This increase will be the result of natural increase (births minus deaths) along with a negative net migration of 712 residents—possibly positive net migration after recent findings.

The Census Bureau administers an annual community survey to cities of a specific size. Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

The survey has been done for Anchorage since 2002, and now it looks as though the results are more complete. Because it is a survey, there are sampling and non-sampling errors associated with the data. The results of the 2008 survey indicate: 8 percent of Anchorage residents are foreign born (8 percent in 2002); 15 percent spoke another language at home (14 percent in 2002)—of these, 31 percent did not speak English well (28 percent in 2002); 6 percent were in poverty (6 percent in 2002); 8 percent of related children under 18 were in poverty (7 percent in 2002).

Other demographic indicators: from 2002 to 2008, the child-rearing age cohort (20-34 year olds) increased 25.4 percent, and the population of the 0 - 4 age group increased 1.6 percent. For 2002 and 2006, the Anchorage birth rate was 67.6 and 73.6, respectively.

The military student population has increased by 7.3 percent from 2003 to 2008. The military and dependent population is expected to increase again

with additional troops being based on Fort Richardson. A net gain of 500 troops was expected by November 2009, and an additional 1,000 by 2013.

This year, the official elementary school enrollment was 367 more students than last year. Last year there was an increase of 144 students over the 2007-08 year. Preliminary analysis indicated those students came from outside of Alaska, and many were military. It is projected that this increased elementary membership will be sustained through the six-year period by this infusion and an increased kindergarten enrollment.

Middle level enrollment was projected to increase in 2009-10 as Clark Middle School comes on-line with its 6-7-8 configuration. Middle schools membership was 223 students more than projected. This increase will continue through the six- year period as the large elementary school numbers move into this level.

High school enrollment was projected to decrease by 275 students. However, membership increased by 110 students. It is estimated that high school enrollment will slightly decrease and then start to increase toward the end of the six-year period.

This year charter school enrollment increased by 116 students over 2008-09. Last year that increase was 229 students. Charter schools are projected to increase throughout the six-year period.

Table 13 shows the districtwide membership projections for the next six years by grade. This table reflects slight increases over the six-year period. This increase comes mainly from the elementary levels, as discussed above.

Table 14 shows the elementary projections for each geographic area. These projections follow the same structure as former years, in terms of the elementary schools assigned to each area. However, rather than calling the areas “High School Attendance Area”, this report labels them by geographic region. Prior reports have created some confusion, because of the terminology it appeared that all students from a particular elementary school would be going to a single high school. Some split boundaries do not allow for a one-to-

one match from feeder schools. Since it is still useful to look at what has happened to enrollments (Table 8), and what is projected to happen to enrollments in various parts of the district, Table 14 is maintained in this report by geographic region.

Table 15 summarizes the projections for each elementary school, and includes the Program Capacity and actual enrollment for September 30, 2009. Prior CIP documents have utilized EED capacities based on square foot allowance for each student as the basis for this capacity number. Program Capacity is based on classroom utilization and makes comparison of capacities between schools a more meaningful process. A summary of the program and EED capacities is provided in the appendix to this report.

Tables 16 and 17 provide the same information for middle school and high school memberships, respectively. Tables 18 and 19 summarize this information for the secondary districtwide schools, charter schools, alternative schools, and special services programs.

VII. Current Facilities Utilization

Program Capacity: The district has made the decision to report its individual school capacities on a program, rather than EED, basis. EED calculations are based primarily on the square footage of the facility and the grade level of students attending the school (elementary or secondary). Based on these calculations, the prototypical 26-classroom school, such as Kincaid, Russian Jack or Lake Hood, has a capacity of 536 students. The EED capacities are often quite different than the program capacities computed on a school-by-school basis, with the number of classrooms and their utilization being the determining factors. For example, the Program Capacity for Kincaid is 484, Russian Jack is 399, and Lake Hood is 515. This difference in capacities for schools that are basically identical in structure is due to the nature of the programs functioning at each of these schools, or the utilization.

Facilities Utilization: Administrators are aware that some programs, or special services, require space beyond the normal capacity of a classroom. Therefore, in this report, information is provided to assist the schools and administration in evaluating the actual number of students that can be housed, based on classroom utilization. Part of this information is summarized in Tables 20-22, which lists information on each school related to number of classrooms, square footage, and relocatable units in use. In Appendix A, in addition to a detailed projection for each school, there is information on the number and types of special programs and special space requirements for each school, as provided by staff of the individual units.

Schools Projected at Greater Than 120 Percent of Capacity: Table 23 lists the projected enrollment of all schools, for the next six years, as a percentage of capacity. Those schools at which the projected enrollment is greater than 120 percent for at least one of the six years projected are highlighted in bold print.

Note: 1) Percentages calculated using membership that included level 3 special ed students, but not preschool students.

2) Charter schools are not included.

(This page left blank intentionally.)

APPENDIX A

Appendix A is a detailed listing of schools, providing enrollment projections by grade for the next 6 years, and other details about space utilization in each of the schools. This listing is organized alphabetically, by elementary, middle and high schools, in that order.

APPENDIX C

Appendix C contains basic information concerning educational space specifications (ed specs) for elementary, middle and senior high schools. These educational specifications were compiled following EED guidelines. Since the adoption of these guidelines, EED revised its guidelines from a net square footage to a gross square footage per student calculation. There have been other minor changes in the way that EED calculates allowable space, which is not directly reflected in the following ed specs. Therefore, the overall space allocations and capacity calculations in the following summaries do not reflect the current EED guidelines, though the basic building programs listed are still valid for building new, or remodeling, school spaces.

Rewritten draft educational specifications may replace these space specifications once adopted by the Anchorage School Board. Submission for School Board approval is anticipated to be in spring 2010.

ELEMENTARY SPACE SPECIFICATIONS

The general space specification for an elementary school is based on projected enrollment of about 550 students in grades K-6. Based upon the State of Alaska Elementary Space Allocation of 106.25 square feet per elementary student, a school will be approximately 58,300 square feet and will be built upon a 15-acre site having no existing infrastructure.

It should be noted that these are preliminary educational space specifications and may change after detailed review of the schematic design.

In addition to the standard elementary school curriculum, this facility will also provide pull out educational programs in resource rooms for main-streamed special education students and students requiring tutorial instruction. The space allocation for schools with additional special education or special services programs utilizing self contained classrooms may be granted an additional square footage allowance with EED approval.

SUMMARY AREA ALLOCATION OUTLINE

Space Description	Number	Area Square Feet Net Allocation (Exclusive of Exterior Wall Thickness)
2.0 Site		
2.1 Bus Loading	8	
2.2 Automobile Parking (According to Title 21)		
2.3 Playground		
2.1 Outdoor Environmental Learning Center		
3.0 Administrative Support		
3.1 Reception	1	150
3.1 Secretarial (Including Secure Closet)	1	420
3.1 Student Timeout	1	40
3.1 Conference	1	225
3.2 Principal's Office	1	250
3.3 Parent Volunteer/PTA/Community School Ctr.	1	250
3.4 Nurse's Room (Including Restroom)	1	335
3.5 Principal Intern	1	90
4.0 Staff Support Services		
4.1 Staff Lounge (Including Restrooms)	1	725
4.2 Production and Storage	1	365

10.1	Music Storage Room	1	100
11.0	Multipurpose Room		
11.1	Multipurpose Room	1	2,500
11.1	Table/Chair/Riser Storage	1	400
12.0	Physical Education		
12.1	Gym	1	3,475
12.1	P.E.Office/Storage (Including Ski Storage)	1	500
13.0	Custodial & Restrooms		
13.1	Custodial and Receiving	1 main, 2 small	400
13.2	Restrooms	2	870
13.3	Central Building Storage	1	540
14.0	Circulation/Support		
	Hallways at 7-1/2 ft. wide		8,050
	Mechanical and Electrical Spaces		870
	Fan Room – 2 nd Floor at 25% of 2,820 sq. ft.		705
TOTAL			56,860

* These function/space allocations are flexible, to be finalized by the Building Committee.

NOTE: The school sq. ft. per student adjusts by State formula based upon membership, school size, and grade level served.

MIDDLE SCHOOL SPACE SPECIFICATIONS

The ASD has updated the space allocation for middle schools. These are space specifications for a middle school with a projected enrollment of 1,058 students in grade 7 - 8. The update is based upon the State of Alaska Secondary Space Allocation of 150 square feet per secondary student. New facilities will be about 158,000 square feet and be built upon a 30-acre site having no existing infrastructure.

The district's allocation recommendation is based on Mirror Lake and Goldenview middle schools. The revised educational specification was approved by the school board in October 2000.

In addition to the standard middle school curriculum, middle schools will also provide educational programs for mainstreamed special education students and students requiring tutorial and special services instruction. The space allocation for schools with additional special education or special services programs utilizing self-contained classrooms may be granted an additional square footage allowance with EED approval.

Summary of Space Requirements

Basic Program	Standard	
	T.S.	Total
Core Academic/Science	33	39,820
Special Education	0	6,600
Instructional Media Center	0	6,400
Visual Arts	2	3,050
Performing Arts	3	5,270
Physical Education	4	23,000
Career Education	4	6,500
Administration	0	3,820
Student Services	0	2,290
Student Dining & Food Service	0	11,400
Maintenance & Custodial Services	0	1,570
Subtotal		109,620
Building Support Areas		44,165
Total	46	153,885

NOTE: ASD middle school capacity would be 46 teaching stations multiplied by a capacity factor of 23 students per teaching station for a total of 1,058 students.

Core Academic Space Requirements

Required Space	Standard		
	Qty.	S.F.	Total
Basic Program			
Language Arts	8	900	7,200
Mathematics	8	900	7,200
Social Studies	8	900	7,200
World Language (May be associated with Library/Media Center)	1	900	900
Science	8	1,200	9,600
Science Prep/Storage	4	250	1,000
Planning Center	8	340	2,720
Textbook and Equipment Storage	4	200	800
Lockers	8	400	3,200
Total	33		39,820

Notes:

1. Based on eight-team Goldenview model.
2. Building support area to incorporate staff toilet facilities in this area.

Special Education Space Requirements

Required Space	Standard		
	Qty.	S.F.	Total
Basic Program			
Resource/Study Skills/Small Group Room	2	500	4,000
Reading/Bilingual/Small Group Room	1	250	500
Basic Life Skills/Intensive Needs [Wet Lab]	1	1,200	1,200
Behavioral Support	0	900	900
Total	4		6,600

NOTES:

1. Resource/small group rooms to be provided within the core academic areas. Locating two adjacent with a folding sound divider increases the flexibility of these spaces.
2. Reading/bilingual small group rooms to be located to support school program.

Library / Media Center Space Requirements

Required Space	Standard		
	Qty.	S.F.	Total
Basic Program			
Main Reading, Reference, Stacks and Circulation			4,500
Librarian's Office	1	150	150
Workroom	1	500	500
Equipment and Non-Print Storage	1	350	350
Periodical Storage Area	1	200	200
Small Group/Conference Areas	2	250	500
Head End Room	1	200	200
Total	0		6,400

NOTE:

- Office size would be adequate for librarian/media specialist. Assistants could have work stations in main library area for accessibility to students.
- Co-location of world language classroom contiguous to the library/media center, increases library/media center square footage by 900 square feet.

Visual Arts Space Requirements

Required Space	Standard		
	Qty.	S.F.	Total
Basic Program			
2-D & 3-D Studios	2	1,200	2,400
Storage	2	150	300
Workroom	1	200	200
Kiln Area	1	150	150
Total	2		3,050

Performing Arts Space Requirements

Required Space	Standard		
	Qty.	S.F.	Total
Basic Program			
Band Room	1	2,000	2,000
Multi-Use/Orchestra Room	1	1,000	1,000
Multi-Use/Choral	1	900	900
Practice Room	4	80	320
Office	1	250	250
Music Library/Workroom	1	300	300
Instrument Storage	2	250	500
Total	3		5,270

NOTE: If multi-use/choral space is not also the performance platform, then space for another program area should be provided.

Physical Education / Health Space Requirements

Required Space	Standard		
	Qty.	S.F.	Total
Basic Program			
Gymnasium	1	11,500	11,500
Aerobics/ Dance	1	3,000	3,000
Fitness / Weight Room	1	1,800	1,800
Classroom / Health	1	900	900
Locker Rooms	2	2,000	4,000
PE Offices	2	150	300
Storage Room	3	500	1,500
Total	4		23,000

1. Approximately 600 square feet of outdoor storage is needed for field equipment, etc., this is not counted in overall building square footage.

Career Education Space Requirements

Required Space	Standard		
	Qty.	S.F.	Total
Business Education	1	1,000	1,000
Family and Consumer Sciences Class/Lab	1	2,000	2,000
Family and Consumer Sciences Storage	1	200	200
Technology Education Classroom	1	1,000	1,000
Technology Education Lab	1	1,800	1,800
Technology Education Storage	1	200	200
Video Production Room	1	120	120
Multi-Use/Planning/Small Group Conf	1	180	180
Total	4		6,500

Administration Space Requirements

Required Space	Standard		
	Qty.	S.F.	Total
Basic Program			
Main School Entrance-See Circulation	0	0	0
Reception Waiting Area	1	300	300
Open Office Area [4-6 people]	1	500	500
Principal's Office	1	250	250
Assistant Principal	1	150	150
Administrative Assistant	1	120	120
Security Office	2	100	200
Parent/Community Work Center	1	300	300
Conference Room	2	300	600
Staff Room [Lounge]	1	700	700
Workroom/Mailroom	1	300	300
Restrooms (3 fixtures each)	2	125	250
Supply Storage Room	1	150	150
Total	15		3820

Note: The disbursement of some administrative space to other areas of the building as appropriate provides greater access. Examples could be the security office and some of the general offices.

Student Services Space Requirements
--

Required Space	Standard		
	Qty.	S.F.	Total
Basic Program			
Guidance/Student Services Reception	1	250	250
Counseling Office	4	120	480
Psychology Office	1	120	120
Special Education Office	1	120	120
Itinerant Office	1	120	120
Small Group Conference Room	1	150	150
Storage	1	150	150
Registrar	1	150	150
Records Room/Vault	1	200	200
School Health Office	1	100	100
School Health Area/Clinic	1	450	450
Total	14		2290

Student Dining / Food Service Space Requirements

Required Space	Standard		
	Qty.	S.F.	Total
Basic Program			
Student Dining	1	8,500	8,500
Kitchen/Serving/Storage	1	2,000	2,000
Office	1	100	100
Multipurpose/Dining Storage Area	1	500	500
Breakroom/Restroom/Lockers	1	200	200
Laundry	1	100	100
Total	6		11,400

Note: Platform for performances is provided by the adjacent multi-use music area.

Maintenance & Custodial Services Space Requirements
--

Required Space	Standard		
	Qty.	S.F.	Total
Basic Program			
Supply Receiving & Loading	1	400	400
Supply, Equip & Misc Storage	1	400	400
BPO Office	1	120	120
Workroom	1	300	300
General Storage	1	200	200
Outdoor Storage [volatile]	1	150	150
Total	6		1570

NOTE:

1. Custodial closets are included in building support/circulation space.
2. Compactor pad and loading area are located outdoors.

HIGH SCHOOL SPACE SPECIFICATIONS

The districtwide Educational Specification document, approved by the board in June 1998, serves as a tool to describe the program and design requirements for any future high school planning in the district.

Educational Programs

Anchorage high schools offer comprehensive programs that include a variety of offerings, both required and elective, in the following general-subject areas:

- Core Academics (English, math, social studies, world language and science)
- Visual arts
- Performing Arts (instrumental music, vocal music, drama)
- Junior ROTC
- Physical education/health
- Family and consumer science
- Business education/marketing
- Technology education

An extensive vocational education program is offered at the King Career Center.

Design Considerations

Several general characteristics must be considered in designing a new high school. The building must be carefully integrated with existing site conditions, nearby neighborhoods and traffic patterns. If the design involves renovation and additions, careful consideration must be given to the existing building to make it contiguous with the planned changes. Site circulation must be designed to safely zone different types of vehicular and pedestrian traffic. Building design must be organized to aid in wayfinding and be easy to supervise and monitor. Ample hallway and common space must be included. It must be possible to separate and secure public-use spaces from other school spaces while providing access to telephone and restroom facilities. Interior lighting must be appropriately provided to meet the needs of each instructional area. Exterior lighting must be balanced to provide safe ingress and egress at all hours. Exterior landscaping should be planned to integrate the existing vegetation, support site circulation, beautify the grounds and provide adequate on-site snow storage, without posing safety hazards. Bus areas and student drop-off/pick-up areas need to be separated from other traffic functions.

Project Parameters

The High School Educational Specification is designed to be flexible to meet the needs of a high school of 1200, 1600, or 2000 students in grades 9 - 12. Additionally, a plan was developed for a 600-student optional high school. The educational specifications can be applicable for future high schools and additions/renovations.

The summary of space requirements for these sizes of schools is based on the State of Alaska Secondary Space Allocation of 150 square feet per student. It is not possible to provide dedicated space for all the functions that occur in a modern high school. To accommodate the need for space, the educational specifications identify basic program space to be provided in all schools. Additional programs can be provided by prioritizing and combining use for the functions listed on the lower section of the Summary of Space chart.

Summary of High School Space Requirements

	1200 Students		1600 Students		2000 Students

APPENDIX D

SITE SELECTION PROCEDURE

Anchorage is a city characterized by fluctuations in population size, shifting residential settlement patterns and a changing age structure. Due to these factors, planning for the provision of needed school sites and facilities in appropriate geographic locations is critical. The planning process involves the cooperation of many persons and agencies. The ASD works closely with appropriate agencies of the United States Government, the State of Alaska and the Municipality of Anchorage. Private individuals and community groups are also involved in this process, whenever appropriate.

Policy-making bodies involved specifically in the school site selection process are the Anchorage School Board, Planning and Zoning Commission, and the Anchorage Assembly. Staff involved in studying, negotiating terms of sale, and recommending school site selections comes from the school district, its consultants, the municipal Department of Community Planning & Development, and Heritage Land Bank.

Although there are a number of variables that can affect duration of this process, overall site selection, approval and acquisition takes about six months.

Identification of Needs

The first phase of a school site selection is identification of the need for a school. The school district identifies geographic areas where additional schools will be needed, based on membership projections. These projections are updated yearly, based on historic and current memberships as well as population trends. This is one function of the 10-Year Capital Improvement Plan document.

Site Selection Process

The second phase is site selection. For a number of years, a Joint Site Selection Committee, composed of school district and municipal members, carried out an extended selection, procurement and acquisition process unique to school sites. Due to its transparent nature, this process created a weak negotiation position by potentially telegraphing intent and raising property owners' price expectations. The municipality's

process for its public facility sites offered a more prudent strategy. Accordingly, the Assembly approved Ordinance AO No. 2007-124(S) to align the school site selection and review process with that followed for other public facilities as stipulated in Titles 21.15 and 25.40 of the Municipal Code. The ordinance deferred preparation of detailed implementation procedures to school district and municipal staff.

The process generally involves identifying sites that may accommodate schools, looking at their land status, size, topography, access, utilities infrastructure, surrounding land use, zoning, and other characteristics. On-site exploration is carried out to investigate soils and analyze engineering characteristics. At the same time, site development costs are estimated and appraisals are prepared. The information is summarized in a report presented with recommendations to decision-making bodies.

Site Approval

The third phase of a site selection is the approval process. When the report is available for public distribution, notice is given of public hearing(s) before the school board and the Planning and Zoning Commission. The school board and Planning and Zoning Commission may meet in a joint public hearing; however, they separately consider and make recommendations to the Assembly. Notices are mailed to nearby property owners and advertisements appear in newspapers three weeks prior to the hearing. Notices are also mailed to community councils. Prior to the public hearing, an informational meeting on the site selection is held with area community councils and representatives from the school district and municipal planning staffs. After one or more public hearings, the school board and Planning and Zoning Commission each make recommendations on their preferred site to the assembly for action. The assembly ultimately selects a site for the school through its approval.

Site Acquisition

The final phase of the selection process is acquiring the site. When purchase of a site is necessary, the Real Estate Division of the Municipal Heritage Land Bank obtains a full appraisal and negotiates the purchase of the property. Final terms are subject to approval of the Assembly.

Schedule of Site Selections

2010-11:

- Chugiak/Eagle River Elementary School

Schedule of Studies

2010-11:

- Student Transportation Facility
- Information Technology Facility Relocation

(This page left blank intentionally.)

APPENDIX E

Appendix E contains basic information which describes the current status of each school facility, including: the year of original construction with gross square footage, year and description of any additions with gross square footage, as well as demolition and replacement facilities. Newly added is a list of schools, including charter schools, that have opened, closed or have been replaced as of 1996.

Schools that Opened, Closed, or Were Replaced or Renewed Since 1996

	School Name	Year Built or Opened	Year Replaced or Renewed	Year Closed
Opened Since 1996	Alaska Native Culture Charter	2008		
	Aquarian Charter	1997		
	Begich Middle	2007		
	Eagle Academy Charter	2005		
	Eagle River High	2005		
	Family Partnership Charter	1997		
	Frontier Charter	2003		
	Goldenview Middle	1997		
	Highland Tech Charter	2003		
	Kasuun Elementary	1996		
	Kincaid Elementary	1996		
	Lake Hood Elementary	1996		
	Mirror Lake Middle	1997		
	Rilke Schule Charter	2007		
	South High	2004		
	Trailside Elementary	2000		
	Tyson Elementary	1996		
	Winterberry Charter	2005
